

AI Citizens' Jury - Start of jury questionnaire

Please complete every question and then press "Done"

* 1. What is your juror number (on the inside cover of your binder)?

* 2. What are your initials?

3. The citizens' jury heard that decisions that affect people's lives can be automated using artificial intelligence. For example, in healthcare, the best-performing artificial intelligence could make more accurate diagnoses than human medical specialists. However, it may not be possible to explain to the people affected how the computer reached its decision.

How important is it to give an explanation? Please select the answer that best describes your view.

- Making the most accurate automated decision is more important than providing an explanation
- In some circumstances an explanation should be given even if that reduces the accuracy of that automated decision
- An explanation should always be given even if that reduces the accuracy of all automated decisions
- Humans, not computers, should always ultimately make the decisions and be able to explain them to the people affected
- Don't know
