

Q3 You will hear that decisions that affect people's lives can be automated using artificial intelligence. For example, in healthcare, the best-performing artificial intelligence could make more accurate diagnoses than human medical specialists. However, it may not be possible to explain to the people affected how the computer reached its decision. How important is it to give an explanation? Please select the answer that best describes your view.

ANSWER CHOICES	RESPONSES	
Making the most accurate automated decision is more important than providing an explanation	27.78%	5
In some circumstances an explanation should be given even if that means the automated decision is less accurate	16.67%	3
An explanation should always be given even if that means that automated decisions are less accurate	11.11%	2
Humans, not computers, should always ultimately make the decisions and be able to explain them to the people affected	38.89%	7
Don't know	5.56%	1
